

Adapting Together

March 4-6, 2026

**Skamania Lodge, Stevenson, WA
in the Columbia Gorge**

About the event

Whether you're shaping fire policy, stewarding the land, engaging your community or learning where to start, your voice matters here. This is our moment to co-create the future of fire in the Northwest — please join us at **Adapting Together!**

This event, hosted by Oregon State University, the Fire Adapted Communities Network and partners, will be an engaging workshop to transform how we adapt and coexist with wildfire in light of dynamic ecological, social and economic challenges. As new fire policies and adaptation strategies have grown across the Northwest, it is essential that we work together to learn, share and craft actionable visions. The workshop will be a space that honors wildfire adaptation as a collective and long-term journey involving diverse voices, generations, roles and experiences. Expect a mix of panels, learning circles, case studies, interactive activities and informal time to connect. Come ready to imagine and engage.

We welcome students, early career professionals, nonprofit organizations, agencies, scientists, practitioners, Tribes and policymakers involved in wildfire adaptation in Northern California, Oregon, Washington, Idaho and Montana.

The following **key questions** will be woven through this event:

1. What is the work of fire adaptation across different communities, and what capacity and resources does it require?
2. How do we maintain and grow a focus on fire as an ecological process and cultural function while protecting communities?
3. What kinds of local partnerships, economic strategies and policies will help us become more fire-adapted?
4. In the next five and ten years, who needs to work together and how so that we can collectively coexist with fire?

Meeting outcomes:

- ▶ Increased relationships and shared knowledge within and across the broader Northwest.
- ▶ New ideas for innovative research and practice.
- ▶ A dynamic digital conference proceedings capturing the content and spirit of the meeting, including graphic meeting sketches, session summaries, reflections, photos, songs and more to honor diverse ways of knowing.

Why sponsor Adapting Together?

This gathering is a visionary movement shaping the future of wildfire adaptation in the Northwest. Your sponsorship will place your brand at the center of a dynamic cross-sector gathering of leaders, practitioners and changemakers across five states and nearly half a million square miles. Given this culturally and ecologically diverse landscape, the meeting presents a unique face-to-face opportunity to learn, connect and help lead wildfire adaptation.

Sponsors will gain visibility through event materials, speaking roles and networking sessions. Given the extent and profile of workshop organizers and sponsors, the recommendations and connections from this event will help drive wildfire policy, land management and community preparedness for years to come. This is more than sponsorship — it's a chance to invest in a future where people and fire coexist in healthier, more intentional ways.

Attendees and sponsors will enjoy:

For attending sponsors who would like to stay and further explore the Columbia River Gorge area, there are many advantages.

- ▶ Skamania Lodge will honor our room block rate of \$155/night plus taxes and fees for three days before and three days after the event.
- ▶ Attendees can receive a 10% off golf, available with tee time.
- ▶ Attendees can receive a 10% off spa services, available with appointment.
- ▶ Overnight parking fees of \$15 per night are waived.

What does sponsorship make possible?

- ▶ Reduced and waived registration rates for those who would not otherwise be able to participate. This ensures that emerging leaders and underrepresented voices can be at the table to help shape the future of wildfire adaptation.
- ▶ Participation of a diverse range of participants — from policymakers and land stewards to community organizers, non-profits and those just beginning their journey in fire adaptation. This diversity is essential to the summit's vision of co-creating solutions across generations and lived experiences.
- ▶ Follow up from the workshop, including future networking opportunities that continue the conversations.
- ▶ Interactive and engaging formats like panels, learning circles and case studies.
- ▶ Networking time to foster meaningful relationships and collaborations.

Sponsorship Tiers
